## HELICHRYSUM

This sharply-scented oil has a reputation as an excellent cell regenerator, and helps to reduce the formation of scar tissue. It contains antiseptic, antispasmodic, anti-inflammatory, antiviral, and antibacterial compounds. Helichrysum stimulates the circulatory and digestive systems (detoxification and cleansing), yet calms the respiratory system, and supports the immune and structural systems. This oil is exceptional for calming nerves, and supporting circulation and healthy skin.\*
