

BEYOND JUICE™ TWIN PACK

The USDA and National Institute of Health recommend five to nine servings of fruits and vegetables per day. Unfortunately, about 70% of Americans do not get the recommended amounts of fruits and vegetables daily. Beneficial nutrients in Fruit fx™ and Veggie fx™ are made up of “phytonutrients” and have complex functions.

- FLAVONOIDS – Plant chemicals that act like antioxidants
- SAPONINS – Complex plant nutrients
- PHENOLS – Organic compounds in fruits and vegetables
- CAROTENOIDS – Vitamin A-like compounds
- ISOTHIOCYANATES – Sulphur containing compounds
- DIETARY FIBER – To support regularity
- GLUCOSINOLATES – Found exclusively in cruciferous vegetables
- PHYTOESTROGENS – Natural estrogens that help maintain normal hormone levels

*“The average person suffers from an annual fruit and vegetable deficit ranging from a low of 219 servings to a high of 1,679 servings.”**

Item# 23602 - 1 month twin pack
Item# 23601 - 3 month supply
